Begonia Crimson Monarch

Two Fine New *BEGONIAS*

(*Semperflorens*)

QUEEN OF THE PINKS. An excellent variety for pots or bedding, growing dwarf and compact with light green glossy leaves. The flowers are a bright rose pink, of medium size and are produced abundantly regardless of size of plants. Many growers have written us commenting on the value of this variety. We have arranged for a steady supply of 2 1/4" plants.

Price: **\$10.00** per 100

Seed **\$1.00** per Pkt.

RED MONARCH. A counterpart of the above, exactly the same in habit and growth except that the foliage is darker green with a slight bronze tint and the flowers are a brilliant dark red.

Strong 2 1/4", **\$12.00** per 100

On the Threshold--

of a new era—Many of us wonder what the future will bring.

We are assured by those who know that we should enjoy continued good business.

Labor unrest, increased methods of rapid transportation, the aeroplane, inflationary trends—will all bring their problems. It will be essential that we be alert and fluid enough to go with the trend as it develops.

New techniques, new varieties and better methods of producing and marketing quality stock will help counteract some of the unfavorable factors. We particularly call your attention to some of the new insecticides, fungides and root producing hormone powders listed on the last few pages. Somerset will always try to keep abreast of developments and bring them to you as soon as available.

We thank you all for your support and patience during the past year.

LOUIS C. SCHUBERT.

ASTERS

(12000 seeds per oz.)

Wilt is a soil borne disease and can only be entirely prevented by soil sterilization. This is comparatively easy and inexpensive. Where steam is not available, formaldehyde gives good results. We will be glad to furnish instructions on the use of this material. Where the soil is reasonably clean of wilt, good results may be had with wilt resistant strains such as we offer. Yellows is carried mainly by leaf hoppers and, to prevent infection, cloth or greenhouse protection is necessary. The longer stems and larger flowers usually pay for this extra care.

AMERICAN BEAUTY (Wilt Resistant)

Valuable for their very late bloom, bearing large compact flowers on long stems.

(19000 seeds per oz.)

This important cut flower lends itself especially for war time use. Requires little heat or labor, the column varieties being especially valuable in this regard. Careful selection of the strongest and notched leaved seedlings and proper feeding (1 lb. ammonium sulphate to 100 sq. ft. every two weeks until buds form) will assure a very high percentage of doubles.

SHASTA DAISY

See Chrysanthemum.

Many perennials do best sown in rows in a cold frame in very early spring. Usually there is less difficulty with germination and the plants can remain until late July and early August when they can be transplanted into their permanent quarters.

All soil used for sowing seed, should be sterilized. One tablespoonful of formaldehyde diluted with six of water, thoroughly mixed with a flat of soil will kill most fungi. Seed may be sown 12-24 hours after treatment. A 5 lb. bottle, enough for many flats, costs only \$1.50.

Hardy Phlox Growing at Somerset

Partial view of our plantings of hardy phlox. Taken in July, the young plants are just starting to bloom. A specialty with Somerset for twenty-five years, you are assured of the best varieties and healthy, vigorous roots.

Hardy Plants

Lack of labor forced us to decide whether we would maintain a complete list of perennials with inadequate amounts of each or concentrate on a few items that we can do especially well. We decided we could serve you best by growing our specialties and maintaining our high standards.

Varieties marked: (R) suitable for Rock Gardens; (C) suitable for cutting; (S) will grow in the shade.

PRICES: 1-3 of a variety at the each rate which is 10c added to the 100 rate; 4-24 plants at 10 rate; 25 or more of one variety at the 100 rate.

ASTILBE (Spirea or Goats Beard)

HARDY PHLOX

This fine hardy garden flower has been a specialty of ours for many years. We try out practically every new variety and do not add it to our list until we are convinced it is better or different from the older varieties. The plants we offer are strong 1 year field grown roots. Supply is limited because of heavy early ordering.

PURPLE HEART. One of our own seedlings that we offered two years ago but withdrew because of an insufficient supply. We believe we now have enough to fill reasonable demands.

Habit of growth is vigorous with dark green healthy foliage. The individual flowers are large and are carried in good size trusses. The color is a brilliant live shade of deep blue purple intensified by a darker center given sparkle by the dainty cream colored anthers

GOOD FOR COMMERCIAL CUT FLOWERS

GIVE GOOD RESULTS OUTDOORS OR UNDER GLASS

Large flowers of greenhouse quality can be grown outdoors. A splendid item for resale at retail and unexcelled for growing commercially outdoors either open or under cloth. Fine for the greenhouse where they can be grown as sprays or disbudded. Under glass they flower from middle to end of October, outdoors they bloom earlier as noted.

Former high prices of 50c to \$1.00 each made these impractical for general use but we have a reasonably good stock and can offer them at prices you can afford to pay.

ROOTED CUTTINGS

Price any of the following varieties \$8.00 per 100

Order not less than 25 of a variety and not less than 100 total order. Orders will be filled in rotation, when ready. We cannot promise to make delivery on any specific date and reserve the right to substitute an equal or better variety unless specifically ordered not to do so. We also reserve the right to allocate quantities if necessary.

ALABASTER. A very early white of large size and good substance. Slightly incurved and will grow five inches across if disbudded. Every mum collection should have this one. August-September.

ALEXANDER MASON. Rich buttercup yellow, large perfectly incurved bloom of fine form and on good stems. Easy to grow. If disbudded to 6 or 8 buds can be grown to 6 inches across. September.

ALWIN. Beautiful salmon pink. A very unusual shade. Grows on nice stiff upright stems. Nice grown in sprays and should also be very nice disbudded. Sept.

ANTELOPE. Salmon-amber with distinct glow of orange on inside of petals; an extremely large incurved exhibition flower, easy grower, long stems, 4 ft. August.

ALFRETON BEAUTY. A large, deep reflexing flower, amber with gold reverse.

BALCOMBE GOLD. A bright old gold. Not a yellow; more of a bronzy orange. A color hard to describe. Flowers incurved and really large if disbudded. September.

BRONZE EARLY BUTTERCUP. Rich deep bronze with golden buff reverse. A fine incurved variety. One of the finest early varieties ever raised, having won many awards. It should be disbudded to a dozen or so buds to the plant to be at its best, otherwise it makes far too many blooms for the stems to be strong. August-September.

BRONZE FREDA. A lovely bronzy salmon variety that is extra fine for table decoration. Petals of quilled formation. Starts blooming early and blooms over quite a period of time. Very frost resistant. Disbuds well and also fine in sprays. August, September.

BETTY FERGUSON. A rosy terra cotta with bronze reverse; large solid incurving blooms; stiff stems and bushy plants. August.

BELLE MAUVE. A lovely stiff-stemmed silvery pink. It disbuds well and is also lovely grown in sprays. Gives a great wealth of cut flowers, fine for commercial cutting. September.

COPPELIA. This is quite a new shade, a bright Indian red—very startling and does not fade with age. Fine strong stiff stems that grow lovely in sprays. One of the best sellers in both plants and cut flowers. August, September.

Mandalay

CHINA GOLD. A bright golden bronze with quilled petals. Does best in sprays. Has very stiff stems, quilled petals and grows very tall. Blooms later than most varieties. Good to lengthen the blooming season. October.

CRIMSON BUTTERCUP. An exceptionally fine variety. Identical with Bronze Early Buttercup except the reverse of the petals are crimson. Should be disbudded. August, September.

CRANFORD CREAM. A fine shading of primrose. A spray variety for cutting. One giving a great wealth of flowers. September.

Purple Jewel

CORAL QUEEN. A very lovely large salmon coral. A beauty. Good in sprays, also disbudded. September.

DOVEDALE. A fine white but must be disbudded to be at its best. September.

ELITE. Light cerise pink with a touch of yellow in the center. Lasting bloom formed of rolled spiky petals. A variety of great merit and stands all weathers. Good disbudded or in sprays. A fine commercial cut flower variety. One cut flower grower said, "The wholesalers grab it up." One of our favorites. September.

FREDA. A beautiful bright silvery mauve-pink, very lovely for cutting. May be disbudded but equally good grown in sprays. Makes a great wealth of flowers and very resistant to frosts. One of the loveliest varieties that we have ever grown. Everybody should have Freda, Salmon Freda and Bronze Freda. September.

FORWARD. This is another step forward, especially for exhibition; may also be used for market; blooms 6 inches across with stiff petals incurving at the tips; color, silvery-peach-pink; a real beauty. 2½ to 3 ft. Early October.

GOLDEN DOME. A golden yellow slightly overlaid orange bronze. A fine incurved type. September.

GOLD STANDARD. This is a true early disbudding variety. The color is as deep as it is possible to get in yellow, with broad florets. Does not fade in sun or rain. May be grown up to 7 inches across. Recommended to early exhibitors. Late September.

GLADIATOR. Very rich chestnut red; one of the finest of its color yet raised. Good disbudded or in sprays. September.

GOLD MINE. Golden-orange, large exhibition flower having numerous petals and very fine center. Good. August, September.

HILLCREST YELLOW. An extra fine richly colored variety. Extra large flowers when disbudded, slightly incurving and of great substance. Tall stiff stems. Winner of several awards. September.

JEAN HARLOW. A bright golden yellow with semi-incurved form. August, September. Best grown in sprays as a commercial.

LEDA. A large heliotrope pink; flowers 6 inches across when disbudded. Also good grown in sprays. Beautiful rolled petals. Stems are extra strong. September.

LUTONIA. A beautiful golden amber, large incurved blooms of perfect form. 2½ ft. September.

MARY HOBBS. Flowers of a beautiful amber and very large. Center petals incurving and outer petals reflexing, forming a first class exhibition bloom. Tall with good stems. You will love it. August, September.

MRS. SMEARDON. A unique combination of old rose and bronze; beautiful large flowers, slightly incurved. Absolutely the earliest. July-August.

MRS. T. RILEY. A very fine white. Large reflexing blooms made up of very broad petals. Very free and erect. You should have this one. September.

MRS. J. PHILLIPS. A deep lavender purple, a color that is in a class all by itself. Petals are long and broad. Gives large full incurved blooms that are fine for cut flowers or for exhibition. August, September.

MARY SUTTERLAND. A rich wine purple with silver on reverse and points of the petals. Flowers are good size and very incurved. Unique. August, September.

NITA. Primrose yellow. Large well formed blooms on tall stiff stems. Best disbudded. August, September.

PRIMROSE. An immense primrose yellow with incurving petals. By all means you should have this lovely variety. Early October.

ROSE PRIMROSE. An excellent variety, one of the best in recent years. Fine variety either disbudded or in sprays. Nice long stiff stems. Salmon rose with a basal blush of gold. Not as early as some of the others, thereby lengthening the blooming season. Oct.

Rose Glow

REVELLER. Bright chestnut red semi-double of good substance; real commercial market type on long stems. Good clean grower and easily disbudded. Stands the sun well. August, September.

ENGLISH CHRYSANTHEMUMS

SYBIL. Large lavender pink. Stiff stems. Good disbudded or grown in sprays. A real acquisition. Also an early bloomer. August, September.

SALMON QUEEN. Sport from Silver Queen, a magnificent variety that can be disbudded or grown in sprays; when disbudded blooms 6 to 8 inches deep are obtained on nice long pliable stems; color is a fine shade of salmon bronze; bright, telling; recommended, 3½ ft. September.

SALMON FRED. A beautiful salmon sport from the well known Pink Freda. Same habit. September.

TRIXIE. A very large salmon apricot pink. A new variety. Long spiky rolled petals. Long wiry stems. Disbuds grand. August, September.

WESTBORNE. A rich dark red of good form. The darkest red we grow. Good strong stiff stems and strong florets that stand the weather well. Would say that you must have it as it is a very distinctive color and variety. September, October.

WHITE LADY. First class variety. Large, disbud. Sept.

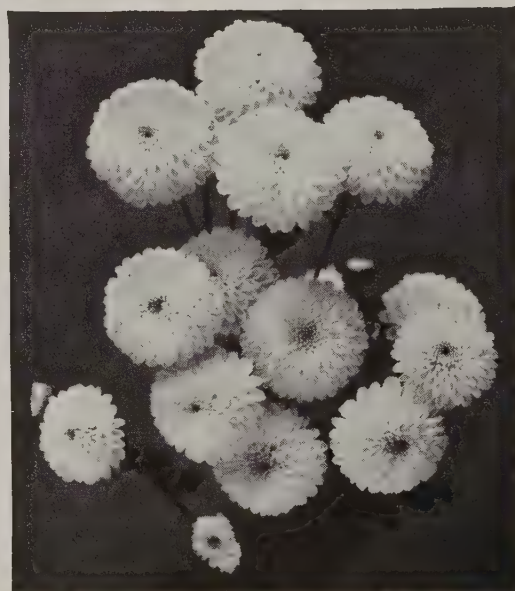

YOUTH. Delightful clear pink of good form. 6 inches across when disbudded. September.

Lawn Grass Seed

SUPERFINE EVERGREEN MIXTURE

This is indeed a superfine lawn mixture including mixed Bents and White Clover. The fine grasses included in this mixture germinate and develop slowly but produce a beautiful permanent lawn when conditions are favorable.

5 lb., \$4.00; \$12.00 per 20 lb.; \$50.00 per 100 lb.

OLD ENGLISH LAWN SEED MIXTURE

The result of skillful blending of various fine leaved grass seeds, including Creeping Bent and White Clover, produces a lawn of excellent quality and beauty enduring all season.

Bu. (20 lb.), \$9.50; 100 lb., \$42.00

SEASHORE FORMULA

Composed of grasses that will thrive under adverse conditions, such as sand low in fertility and moisture and intense heat.

Peck, \$4.00; Bu. (20 lb.), \$15.00; 100 lb., \$60.00

SPLENDOR LAWN

A moderately priced mixture, containing no White Clover, that is capable of producing a satisfactory sod in a short time.

Peck, \$2.00; Bu. (20 lb.), \$6.00; 100 lb., \$25.00

SHADY LAWN

Blended of species that have been proven by test to best survive shaded and adverse conditions. This mixture is capable of producing a fine close knit turf under trees, in areaways, etc., where little sunlight is able to get through.

Peck, \$2.50; Bu. (20 lb.), \$8.50; 100 lb., \$40.00

LANDSCAPE

A thoroughly recleaned, weed free mixture, excellent for a quick sod.

Bu. (20 lb.), \$5.00; 100 lb., \$20.00

WHITE DUTCH CLOVER 98% PURE

5 lb., \$6.75; 25 lb., \$27.50

WHITE DUTCH CLOVER 70% PURE (TIMOTHY MIXTURE)

5 lb., \$4.75; 25 lb., \$20.00

All the above grass seed are offered F.O.B. New Brunswick

Cut flower prices on glads have been excellent during the past few years and it is our opinion they will remain reasonably good during this next summer. Bulbs are in short supply and good cut blooms will not be too plentiful.

If you have bulbs in storage, we call your attention to the naphthalene flakes offered on page 44. For keeping your plants free from thrip, we suggest spraying with tartar emetic offered on page 45.

ROSES

Again it has been necessary to allocate the stock available among our customers on a basis of their purchases during previous years. We have hopes that next year will see an end to this shortage and that we will again be able to serve our many friends according to their needs.

Insecticides and Fungicides

While prices are frozen by the government, occasionally changes may be necessary and we reserve the right to correct prices.

ARSENATE OF LEAD

A stomach poison used to combat most chewing insects. Because it discolors the foliage it is rarely used under glass.

4 lb. Bag	\$.70
Case 12-4 lb. Bags	7.50

AZOFUME—70

A new material that has given remarkable kills of all stages of red spider mite on roses with a single fumigation. Large scale tests have included full houses of most of the common commercial varieties of roses. Experience so far indicates a reasonably wide margin of safety. A satisfactory dosage for most houses is 1 lb. to 40,000 cubic feet.

PINOCCHIO

(Yoder Bros.)

A glistening white button for early cloth house shading. It responds beautifully to black cloth treatment and for this reason we believe it will fill the insistent demand for a small white pompon that can be easily shaded into late August and early September maturity. The flower is a beautifully formed tightly quilled button of lively and dainty appearance. It is of hard substance and has good keeping and shipping qualities. The color is a clear sparkling white. The growth is vigorous, taller than Irene and requires less time between pinching and shading to form a fuller spray of flowers. Bunches of Pinocchio appear smarter than Irene because the spray formation is more nearly single planed; and fresher because of the more uniform opening of its flowers.

This variety and many other new and standard cut flower varieties are listed in our Special Mum Flowering Schedule and Price List.

The New Dawn

Plant Patent No. 1

A REAL AMERICAN DOORYARD ROSE

Hardy—Really Blooms All Summer
Dark green glossy foliage
Vigorous climber
Well formed, double, fragrant flowers
You can recommend it.

Since its introduction The New Dawn has been grown in every state. North or south it has been commended for its free blooming quality and general usefulness. Especially in the section where intense cold makes it difficult to grow most climbers, The New Dawn seems to outdo itself and gives even better results than with us here in New Jersey.

Margaret Moeller

(Yoder Bros.)

A clear white standard that matures December 10, following December Glory and just preceding Smith's Late White. Responds well in either raised or ground beds, however, it is especially suited to ground bed culture. May easily be delayed for Christmas and late flowering by the use of lights. Price **\$100.00** per 1000 Rooted Cuttings. This variety is also listed in our Special Mum Catalogue.
